DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As for claim 1, the prior art, alone or in combination, does not teach or fairly suggest a local communication system with multiple devices and a remote control with selector means for identifying a selected device and virtual control means for determining which operational functions of the selected device do not have a corresponding control on the remote control device, therefore presenting those missing operational functions as a user actuable simulacrum on the display device for interaction therewith. As for the most pertinent prior art of record, the Welmer (EPO 0535749) reference discloses a system for displaying menu items defined by control sub devices in a D2B system, with menu integration and remote control operation of the different devices on the D2B network. Page 2, lines 14-31 disclose a system for providing a display of control functions to the user via a display device based on what selected apparatuses on the network know about other apparatuses. The OSD display of a menu of functions is disclosed on page 4, lines 53-57. However, the Welmer reference does not explicitly disclose that a determination is made as to what functions should be present on the OSD menu based on what functions are missing from the remote control, and there is no suggestions to make this determination.

Another reference, Fujita (USPN 5,598,523) discloses a similar system, wherein a home-bus system is arranged and configured to display operational functions of

selected devices on the display device for actuation by the user through a remote control. Figure 7b shows the overview of the network, wherein the remote control is used to pick operational functions associated with certain devices. The Fujita reference also discloses the optional feature of automatic menu generation, which allows the system to poll the network to discover device status and availability and generate menus based on this status [col. 7, lines 25-36]. However, the Fujita reference does not explicitly disclose that a determination is made as to what functions should be present on the menu based on what functions are missing from the remote control, and there is no suggestions to make this determination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
